Version 19.1.

Download Version 19.1

Tested SAP B1 versions

- SAP B1 9.2 PL11 (MSSQL 2012, 2016, HANA 122.05)
- SAP B1 9.3 PL08 (MSSQL 2017, HANA 122.16)

Note: Older and newer SAP B1 versions will usually also work, but have not been specifically tested in this version.

Before the upgrade, please check the release notes of the intermediate versions between the current version and the version you would like to upgrade to.

Starting from version 18.3 the license module uses the Boyum IT portal for the licenses, therefore, when upgrading from a version older than 18.3 to version 18.3 or higher, please make sure that you have a license on the Boyum IT Portal. Consequently, the old Produmex license files should not be used any more.

Before installing Produmex Manufacturing v19.1 make sure that the maintenance fee payment has been made, otherwise the add-on will stop after installation.

New Functions

- CR-938 - Selecting Co-workers on PDC Start Job Screen and Group Time Booking
  - The name of the new setting is *Maximum number of co-workers for PDC job* and it defines the maximum number of co-workers an employee can select in PDC to work in the same work center on the same operation.
  - Please see:
    - Configuration Guide/ 1. Produmex Manufacturing Settings/ Maximum number of co-workers for PDC job
    - Functional Guide/ 19. Using Time-Based Resources in Work Centers and PDC/ 19.3.4. Selecting Co-workers in PDC
