

How to Use Wiki

Tips

Search in the documentation of a given product only

It is possible to search in the documentation of a given product only. In the Search field, enter your keyword and add '@implementation:product name'.

The following products have separate documentation:

- Produmex WMS: *keyword @implementation:wms*
- Produmex Manufacturing: *keyword @implementation:manufacturing*
- Produmex Scan: *keyword @implementation:scan*
- Produmex Weigh: *keyword @implementation:weigh*

Exclude the documentation of a given product

It is also possible to exclude the documentation of a given product. In the Search field, enter your keyword and '^implementation:product name'.

For example, in order to search in the documentation of Produmex WMS, Weigh and Quality, enter the following:

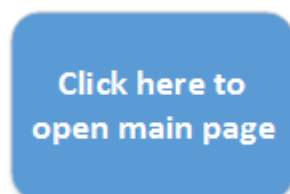

```
keyword ^implementation:manufacturing ^implementation:scan  
^implementation:operator
```

Note: If you have access to the internal pages, you have to exclude them as well. For example, in order to exclude the Produmex WMS documentation, add the following:

```
keyword ^implementation:wms ^internal:wms
```

Flowchart links

Certain elements of the flowcharts work as a link. Click on the flowchart element to go to the relevant section of the page or to open related documentation.
