

What's New in the Latest Version?

19.3 release

1. New Features

Picking	Ad Hoc Picking (Pick List): setting <i>Show Stock for Location</i>
	New print event: 204 - Picking: after item is picked
Packing	Packing script: Optimizing Sales Shipping
	Packing Controller: <i>Pick List Order By</i> setting
General	Usability Improvement Program (UIP)
General	Localization: Danish translation

3. Other Changes

Picking	setting <i>Consolidate Items to Pick</i> setting: When picking full SSCCs with items managed by serial numbers, the allocation of serial numbers is automatic, that is, it is no longer necessary to scan the serial numbers as well.
