What's New in the Latest Version?

19.3 release

1. New Features

Ad Hoc Picking (Pick List): setting Show Stock for Location
New print event: 204 - Picking: after item is picked
Packing script: Optimizing Sales Shipping Packing Controller: <i>Pick List Order By</i> setting
Packing Controller: Pick List Order By setting
Usability Improvement Program (UIP)
Localization: Danish translation

3. Other Changes

setting Consolidate Items to Pick setting: When picking full SSCCs with items managed by Picking serial numbers, the allocation of serial numbers is automatic, that is, it is no longer necessary to scan the serial numbers as well.
