Version 19.3

Produmex download page
Download version 19.3

Tested SAP B1 versions

- SAP B1 9.3 PL11 MSSQL 2016

Note: Older and newer SAP B1 versions usually also work, but have not been specifically tested in this version.

19.3.1.2

DB version: 704

DB Branch version: 0

Required Add-On Loader version: 7

Picking

- 1. Ad Hoc Picking (Pick List task): Setting *Show Stock for Location* is added to the Pick List Controller.
  - If the setting is enabled on the Pick List Controller, the *Select a Pick Location* screen shows the free stock quantity of the selected item for each location listed on the screen.
  - Documentation: Pick List Controller, Ad Hoc Picking / Pick List task
- 2. New print event: *204 - Picking: after item is picked*
  - Applies to picking flows using pick lists as an input (Picking flow, Ad Hoc Picking (Pick List), Pick List for Production)
  - The print event is triggered when the full quantity of an item is picked.
  - Filter *Document Line (PRFDOCLI)* is added to the Print Events tab of the Organizational Structure: it uses the new setting *Print After Item Picked* of the *Produmex Pick List Types* (PMX_PLTY) UDT to check whether a document should be printed.
  - Documentation: List of Print Events, Print Events tab, Produmex Pick List Types (PMX_PLTY) UDT
- 3. Pick List Controller: *Consolidate Items to Pick* setting
  - When picking full SSCCs with items managed by serial numbers, the allocation of serial numbers is automatic, that is, it is no longer necessary to scan the serial numbers as well.

Packing

- 1. Packing script: Optimizing Sales Shipping

- 2. Setting *Pick List Order By* is added to the Packing Controller:
  - Defines the sorting of pick lists on the *Select a Pick List* screen of the Consolidated Packing and the Cash Register Packing flows.
  - Documentation: Packing Controller

General

- 1. Localization: Danish translation
- 2. Usability Improvement Program (UIP)
  - Setting *Usability Improvement Program* is added to the General tab of the Organizational Structure.
  - If the setting is enabled, the add-on automatically sends information to Boyum IT about how the product is used and that information is used to improve the related features. The gathered data sent to Boyum IT can be:
    - Feedback: generic information (e.g. SAP version, resolution) and add-on specific information (e.g. number of configurations)
  - For more information about UIP click here.
  - Documentation: Organizational Structure / General Settings

Documentation maintenance

- Cycle Count Controller
  - If setting *Manually Set Price on Processing the Count* is enabled, settings *Price List for Goods Issue* and *Price List for Goods Receipt* are ignored for any price calculation.
- Additional Expenses Generator
  - Generating additional expenses is supported in the following cases:
    - (1) Target document: Sales Delivery
      Base document: Sales Order or Sales Invoice
    - (2) Target document: Sales Invoice
      Base document: Sales Order or Sales Delivery
    - (3) Target document: Purchase Delivery
      Base document: Purchase Order or Purchase Invoice

Bugfix

Ticket	Description
N/A	ASN Reception - Serial number import is not working on Interfacing tool
N/A	ASN Reception - Quantity Per UoM error on Fat Client
N/A	Consolidation Packing - order is different from Picking order
N/A	Picklist proposal - Due Date is set to 31/12/9999 19_3_1_29
79458	Printing - Coresuite Report Printer does not support HANA 19_3_1_28
87882	Cycle Count - Price list issue
87899	Organizational Structure - XML error when executing OSE export-import
88195	Packing - The pick list line has status *Packed*, but has no open quantity
90492	Sales Delivery - Not passing Sales BoM parent as reference
91358	Shipping - Error when posting delivery with BoM after packing
91609	PK-FK column length discrepancy in PMX tables fixed
91974	Move to Production Line - Quantities are not always updated
92169	Picking - Shows SSCC from another dock 19_3_1_26

Ticket	Description
92612	Production Order - Remove button 'Preprint item labels' 19_3_1_18
93000	Shipping - Quantity for Sales BoM is wrong 19_3_1_32
93105	Move does not work for one of 2 similar locations 19_3_1_6
93348	Move to Production Line - SSCC validation does not work correctly
94480	Shipping - Missing freight 2 information in Sales Delivery lines 19_3_1_48
94518	Pick list proposal - In presence of Beas when opening the form: Invalid query tree [300-33]. SQL error 2048.
94973	Zone picking - Incorrect error in some cases: There is no more item to pick 19_3_1_34
95091	Warehouse Transfer - WMS SSCC appearing on 2 different master SSCCs at once 19_3_1_8
95381	Batch Number Selection - Error in case of Issue for Production 19_3_1_8
95808	Receipt from Production - Not enough free stock
95877	ASN - SSCC (LUID) loaded from the ASN should be created if it does not exist in the system 19_3_1_5
96311	Picking - negative stock 19_3_1_11
96326	Organizational Structure - taking too much time to open and system gets hanged
96480	Reception - When creating GRPO, *13* is not a valid value for property *BaseDocType*
97339	Logistic Carrier - anomaly 19_3_1_24
97624	Licensing - Handling more than 100 pieces of license caused an error 19_3_1_19
98195	Goods Return - No stock available 19_3_1_23
98401	Picking - Full pallet with 2 items and logistic carrier causes negative stock error 19_3_1_33 Further bugfix: Picking - The forced Full Pallet Picking does not work correctly as before 19_3_1_43
98560	Receipt from production - Using branches causes error 19_3_1_27
98725	Reception - Container logistic carrier selection does not work well 19_3_1_16
98938	Sales Return - Missing parameter error 19_3_1_15
98985	Delivery Doc Error 19_3_1_41
99853	Picking - SAP serial number should not be used from another warehouse 19_3_1_16
99995	Organizational Structure - Bin Location cannot be deleted or added to another warehouse 19_3_1_14
101825	Goods Receipt - In case of same location and same SSCC defined, different LUIDs can be generated 19_3_1_35
103143	Zone picking - Incorrect error in some cases: There is no more item to pick 19_3_1_34
104248	Picking - Error in case of A/R Reserve Invoice and Auto Invoice 19_3_1_38
105175	Production - Best Before Date is not asked for multi UOM items on reception 19_3_1_40
106367	Shipping - Wrong line quantity in case of Sales BoM 19_3_1_41
106563	Production - Overpicking is not possible with Continuous Picking 19_3_1_40
106978	Production - Time Registration with Resources throws an error 19_3_1_42
108183	Warehouse Transfer - Logistic Carrier does not appear on the location with the new LUID/SSCC when using Partial Logistic Unit 19_3_1_51
108228	Weighing - Rounding is not using decimals on reception 19_3_1_54
108332	Goods Receipt PO - PMX serial number duplication 19_3_1_48
109116	Production Order - Setting Steplist is not always possible and it causes error 19_3_1_46
112045	Shipping - Rounding error when creating Delivery Note 19_3_1_52
113106	Problem with split produced quantity into logistic units of default size during Receipt from Production Flow 19_3_1_55
