

Produmex WMS 2022.09

[Produmex download page](#)

[Download version 2022.09](#)

Tested SAP Business One versions

- SAP B1 10.0 FP2202 HF1 64-bit MSSQL 2017
- SAP B1 10.0 FP2202 HF1 64-bit HANA 2.00.044.00

Note: Older and newer SAP Business One versions usually also work, but have not been specifically tested in this version.

Make sure that you do not use SBO10 PL3 (FP2008) or PL4 (FP2011) including any of their hotfixes with Produmex WMS. If you are about to upgrade SAP Business One to a PL higher than the one we have tested Produmex WMS on, make sure that you always test your Produmex WMS processes in a test SAP environment before performing the SAP PL upgrade on the live environment. For more information click [here](#).

DB version: 757

DB Branch version: 0

Required Add-On Loader version: 21

Disassembly Flow and Disassembly - Weight Flow: weight system

- The *Weight Capture needed during Production* setting on the Item Master Data > Produmex tab > Production tab applies to the Disassembly Flow and Disassembly Weight Flow as well.
- If the setting is enabled, the system displays the *Enter the weight* screen and the product / by-product must be weighed with a scale during the flows.
- If the setting is disabled, the system displays the normal *Enter the quantity disassembled* screen.
- Prerequisites: There is a scale defined for the production line.
- If more scales are defined under the same production line, the flow displays the `Switch scale` button.
- The setting applies to items that are not managed by serial numbers.
- If the item is a catch weight item, you can weigh the item after the first quantity has been added.
- See documentation on configuration [here](#), the Disassembly Flow [here](#) and Disassembly - Weight

Flow [here](#).

Weigh Flow: Default scale to be defined for user

- The Default Scale tab has been added to the Thin Client element of the Organizational Structure.
- On the tab you can define default scales for users.
- The defined default scales can be used during the Weigh Flow.
- After tapping Switch Scale, the Weigh Flow displays the usual *Select Scale* screen. Two buttons have been added to the screen:
 - Set Default Scale
 - Unset Default Scale
- The system displays the buttons on the *Select Scale* screen if the user belongs to a PMX User group that has the following authorization on the Link Usergroup to Authorization UDT:
 - Weigh order: overrule switch scale
 - Weigh order: overrule default scale
- See documentation [here](#).

Production: Consume all material on production line

- The *Consume All Material on Production Line When Closing Production Order* setting has been added to the General tab of the production line in the Organizational Structure.
- If the setting is enabled, with the end of the production all materials linked to the production line are issued, that is, no stock remains on the production line and the remaining quantity is 0.
- The issued quantity can be equal to or higher than the planned quantity on the Issue for Production document.
- See documentation [here](#).

Bug fixes

Ticket	Description
N/A	Reception - catch weight item weight is 0
N/A	Item listing in Ad Hock Picking is slow with HANA
158307	Sequences in the replenishments do not work with value "Order by BBD, ItriKey (FEFO_ITRI)" in setting Stock order by
160178	Using multiple logistic carriers during Picking creates multiple lines on sales delivery note and not summing the identical logistic carrier lines
160839	Only pick items on location on same or lower level as dock? (Y/N) allowing partial pick lists 2022.09.02
164169	Cycle counting error when zero out stock
164434	WMS Cycle Count Process does not show item cost
164837	Produmex Production order link - Parent Production Order Golden arrow not working 2022.09.01
165288	Probable bug with route containers in Produmex WMS
165623	PO line Qty at Reception
167946	WMS 3PL Invoicing screen - Error when 'Add zero-price lines to 3PL invoices' is off
168175	Can't add another zone attribute if the inventory report wasn't loaded once 2022.09.01
168383	ISF - Move from addon throws error message
168706	Multiple picklists are generated via BEAS

Ticket	Description
170169	Logistic Carriers on Purchase Reception : Error 3000005: No Open PurchaseOrder lines found for item with code 'XXXXXX'
170784	Trailer Selection Screen Hanging after navigating back to the previous screen
171975	Error with "RDR1"."TreeType" when trying to add a Pick List Proposal from Proposal Manager for BOM items on Reserve Invoice
