

# Produmex WMS 2022.12

[Produmex download page](#)  
[Download version 2022.12](#)

## Tested SAP Business One versions

- SAP B1 10.0 FP2202 HF1 64-bit MSSQL 2017
- SAP B1 10.0 FP2202 HF1 64-bit HANA 2.00.044.00

*Note: Older and newer SAP Business One versions usually also work, but have not been specifically tested in this version.*

Make sure that you do not use SBO10 PL3 (FP2008) or PL4 (FP2011) including any of their hotfixes with Produmex WMS. If you are about to upgrade SAP Business One to a PL higher than the one we have tested Produmex WMS on, make sure that you always test your Produmex WMS processes in a test SAP environment before performing the SAP PL upgrade on the live environment. For more information click [here](#).

**DB version: 759**

**DB Branch version: 0**

**Required Add-On Loader version: 21**

---

## Packing - Allow skipping serial numbers when scanning

- Added possibility to skip serial numbers in the touch screen Packing flows. Applies to the Packing, Item Packing and Consolidation Packing flows.
- With this enhancement operators now can skip goods that cannot be packed while scanning the serial numbers during packing.
- Two new buttons are added to the *Scan a Serial Number* screen.
  - *Skip*: Skips a single item. The serial number scanning can be continued but the number of items to pack is lowered by one.
  - *Skip all*: Skips the remaining items. The serial number scanning is finished and only items with scanned serial numbers are packed.
- See documentation [here](#).

## Packing - Block scanning the same serial number again

- New check added to prevent operators to scan serial numbers multiple times during packing.

- If the scanned serial number is already packed, a detailed error message is shown containing the dock and logistic unit where the scanned serial number is located.
- Note: If the same serial number is scanned with two devices, the check will not happen as the data is still under collection.

## Additional changes

- **Translation**
  - Ukrainian translation (code 33) has been added to the localization file. See the list of available translations [here](#).

## Bug fixes

Ticket	Description
N/A	Cycle Count processing for Serial+OnEveryTransaction+NoTrackLocation+Has SSCC items
N/A	Ad Hoc Picking - Exception when autoselecting a movable location
N/A	Consolidated picking - error if the Pick items order by setting is Sequence, Location code, Full LUID
N/A	Shipping - Wrong order for text lines
185610	Move order with 'Item' as Stock Level does not work <a href="#">2022.12.01</a>
185614	Stock quantity not showing for Bulk Bins during Ad-Hoc Picking <a href="#">2022.12.01</a>
183838	Stock allocation method in picklist proposal does not work properly when using UOM groups <a href="#">2022.12.01</a>
183437	Malfunction when receiving stock with change in batch handling from a transit warehouse <a href="#">2022.12.01</a>
184898	Print event 700 triggers before the PMX_INVT table is updated in HANA <a href="#">2022.12.01</a>
182288	Picking lists remain in a partially packed state <a href="#">2022.12.01</a>
