Produmex WMS 2022.13

Produmex download page
Download version 2022.13

Tested SAP Business One versions

- SAP B1 10.0 FP2202 HF1 64-bit MSSQL 2019
- SAP B1 10.0 FP2202 HF1 64-bit HANA 2.00.044.00

Note: Older and newer SAP Business One versions usually also work, but have not been specifically tested in this version.

Make sure that you do not use SBO10 PL3 (FP2008) or PL4 (FP2011) including any of their hotfixes with Produmex WMS. If you are about to upgrade SAP Business One to a PL higher than the one we have tested Produmex WMS on, make sure that you always test your Produmex WMS processes in a test SAP environment before performing the SAP PL upgrade on the live environment. For more information click here.

DB version: 759

DB Branch version: 0

Required Add-On Loader version: 21

Additional changes

- **Serial - Bulk input method**
  - A new serial number input method is included in the '*Reception*' flow, the '*Packing*' flow, the '*Consolidated Packing*' flow, the '*Item Packing*' flow and the '*Mobile Packing*' flow.
  - This input method is designed to handle serial numbers scanned in bulk, for example when scanning a barcode containing multiple serial numbers. Serial numbers can be added one by one but the serial number validation only runs after the user proceeds from the input screen. See here.

Bug fixes

Ticket	Description
189500	Production Order Form - Error when subscribing to item event
187568	Customization screens not allowing scan without getting focus on field 2022.13.01
