# Produmex WMS 2023.12

Produmex download page
Download version 2023.12

**Tested SAP Business One versions**

- SAP B1 10.0 SP 2311 64-bit MSSQL 2019
- SAP B1 10.0 SP 2311 64-bit HANA 2.00.059.09

*Note: Older and newer SAP Business One versions usually also work, but have not been specifically tested in this version.*

Make sure that you do not use SBO10 PL3 (FP2008) or PL4 (FP2011) including any of their hotfixes with Produmex WMS. If you are about to upgrade SAP Business One to a PL higher than the one we have tested Produmex WMS on, make sure that you always test your Produmex WMS processes in a test SAP environment before performing the SAP PL upgrade on the live environment. For more information click here.

With SAP B1 version 10.0 SP 2311 when trying to access database table via User Interface (UI) API, the user might get an error //“Cannot access table. Please check it is listed in the allowed list. For more information, see SAP Note 3375193.” //
To solve the issue, go to Administration → System Initialization → General Settings → Services tab → UI API Configuration group, click the '...' button after 'Enable Query Validation' and append the table to the list. Alternatively, turn off 'Enable Query Validation'.

**DB version: 764**

**DB Branch version: 0**

**Required Add-On Loader version: 22**

---

**Features**

- ** Moving Beas-reserved logistical units through the AddOn**

In the Beas-WMS integration feature, WMS can now reallocate Beas WO locks for storage locations

directly through the AddOn as well (as with the mobile client previously). When choosing one or multiple lines on the Inventory Report with Beas lock(s) present, it is possible to override the Beas lock on the selected SSCC and have it reinstated for a new location.

*In a real-life scenario it is useful to know throughout the production - and logistic - process where all items (including all production raw materials or items, too) are positioned within the warehouse at any given point. For enhanced efficiency and accessibility for production, placing a lock or reservation on certain items can be key so that they are 'locked' into their designated storage location within the warehouse and not transferred accidentally. However, in certain situations, locked materials might need to be moved from their allocated position by logistics e.g. due to lack of storage space. In this scenario it is possible to override the production lock on the logistics side and reallocate it for the item at a different storage location, so that the repositioned items can be found instantly and easily by production - creating a new, allocated storage space.*

In this process, when confirming a move for the selected, locked line(s) on the inventory report, WMS removes the Beas WO lock in order for the unit to be moved and notifies Beas about the transfer. Beas then reinstates the lock for the new location after the move has been performed. With single lines, it is also possible to select reservations. See documentation.

- ** Routes Map function uses Chromium-based browser engine**

The Routes Map function now uses the latest, Chromium-based browser engine to plan transportation. See documentation.

### Bug fixes

| Ticket | Description |
|---|---|
| 209323 | Issue goods receipt returnable items2023.12.00 |
| 210840 | Picklist Robot doesn't work with SSO2023.12.00 |
| 206057 | PMX WMS Putaway Strategy bug2023.12.00 |
| N/A | WMS-Beas Integration Reservations deleted from SO modifications2023.12.00 |
| 209449 | Since Update SAP 10.0 SP2308 - Produmex is erroring in SAP with arabic letters 2023.12.00 |
| 208518 | Picklist Proposal Manager doesn't generate PLP2023.12.00 |
| 202738 | Not able to scan a moveable location in the packing station 2023.12.01 |
| 211929 | Production Client does not work anymore after change in way lined up locations are selection in production script2023.12.01 |
| 212174 | 'Error when subscribing to item event.'2023.12.01 |
| N/A | Not possible to define PMX serial numbers in Picking/WH Move2023.12.01 |
| N/A | Incorrect cooperation with old BEAS version2023.12.01 |
| 213901 | When creating a purchasing goods return on the scanner, linked to an existing GRPO, the scanner shows an error message and blocks the return2023.12.02 |
| 211073 | Quality Status changes2023.12.02 |
| N/A | WMS-BEAS Inventory Report move issue with multiple lock2023.12.02 |
| N/A | Packing and Item packing flow - Cannot input decimal value if the decimal symbol is “,” in regional settings2023.12.02 |
| 212992 | Cycle count for serial number item2023.12.02 |
| 212477 | Listener not working correctly when there are more than 1 line on the sales orders on HANA2023.12.02 |
| 209282 | Error when receiving the same item from multiple ap reserve invoices on the same container2023.12.02 |

| Ticket | Description |
|---|---|
| 215073 | Picklist Proposal not respecting batch allocations when different batches allocated to different lines of the same itemcode2023.12.02 |
| 215189 | Purchase Return flow: Quantity cannot exceed the quantity in the base document during booking Goods Return 2023.12.03 |
| 185722 | CycleCounting of a logistic unit with a logistic carrier inside does not work 2023.12.03 |
| 213558 | Picklist proposal Info window appears unnecessarily 2023.12.03 |
| 214621 | Unable to view ASN screen to edit reception before posting 2023.12.03 |
| 214748 | The whole system is freezing when the two users want to shipping at the same time 2023.12.03 |
| 210726 | Error posting open ASN Lines 2023.12.03 |
| N/A | Last SAPCheck too long ago, exiting... error in add-on log 2023.12.03 |
| N/A | Purchase Return flow: Bad batch identification on original GRPO 2023.12.03 |
| 216428 | Inventory Locking not considered due to error in store procedure 2023.12.04 |
| 219166 | Can't hide 'No SSCC' button on Fat Client 2023.12.04 |
| 211154 | WMS does not remove PMX_INLD entries when deallocating a batch on a Sales Order 2023.12.04 |
| 215421 | Pick List Proposal for Inventory Transfer Request Does not Respect Locking 2023.12.04 |
| 211268 | Production Order incorrectly takes into account its own allocated inventory as locked stock 2023.12.04 |
| 217952 | Unable to stop Production 2023.12.04 |
