Produmex WMS 2025.03

Produmex download page
Download version 2025.03

Tested SAP Business One versions

- SAP B1 10.0 FP 2502 64-bit MSSQL 2019
- SAP B1 10.0 FP 2502 64-bit HANA 2.00.059.09

Note: Older and newer SAP Business One versions usually also work, but have not been specifically tested in this version.

Make sure that you do not use SBO10 PL3 (FP2008) or PL4 (FP2011) including any of their hotfixes with Produmex WMS. If you are about to upgrade SAP Business One to a PL higher than the one we have tested Produmex WMS on, make sure that you always test your Produmex WMS processes in a test SAP environment before performing the SAP PL upgrade on the live environment. For more information click here.

With SAP B1 version 10.0 SP 2311 when trying to access database table via User Interface (UI) API, the user might get an error //“Cannot access table. Please check it is listed in the allowed list. For more information, see SAP Note 3375193.” //
To solve the issue, go to **Administration → System Initialization → General Settings → Services tab → UI API Configuration group**, click the '...' button after 'Enable Query Validation' and append the table to the list. Alternatively, turn off 'Enable Query Validation'.

With SAP B1 version 10.0 FP 2405 when trying to access database table via Data Interface (DI) API, the user might get an error //“Cannot access table. Please check it is listed in the allowed list. For more information, see SAP Note 3399053.” //
To solve the issue, go to **Administration → System Initialization → General Settings → Services tab → DI API Configuration group**, click the '...' button next to Enable Query Validation and append the database table to the allowlist.

DB version: 774

DB Branch version: 0

Required Add-On Loader version: 22

Release Notes
Previous Release: 2024.12

New Features:

- **MSSQL 2022 Support**
  - MSSQL Server 2022 is supported from product version **2025.03**
- **WEB API Improvement: 9 New methods!**
  - We have enhanced the existing WMS Web API by adding additional methods. This new generation of API methods significantly improves how quality status changes and stock movements are handled in Produmex WMS.
