Produmex WMS 2026.04

Produmex download page
Download version 2026.04

Tested SAP Business One versions

- SAP B1 10.0 FP2602 64-bit MSSQL 2019
- SAP B1 10.0 FP2602 64-bit HANA 2.00.059.09

Note: Older and newer SAP Business One versions usually also work, but have not been specifically tested in this version.

Make sure that you do not use SBO10 PL3 (FP2008) or PL4 (FP2011) including any of their hotfixes with Produmex WMS. If you are about to upgrade SAP Business One to a PL higher than the one we have tested Produmex WMS on, make sure that you always test your Produmex WMS processes in a test SAP environment before performing the SAP PL upgrade on the live environment. For more information click here.

With SAP B1 version 10.0 SP 2311 when trying to access database table via User Interface (UI) API, the user might get an error //“Cannot access table. Please check it is listed in the allowed list. For more information, see SAP Note 3375193.” //
To solve the issue, go to **Administration → System Initialization → General Settings → Services tab → UI API Configuration group**, click the '...' button after 'Enable Query Validation' and append the table to the list. Alternatively, turn off 'Enable Query Validation'.

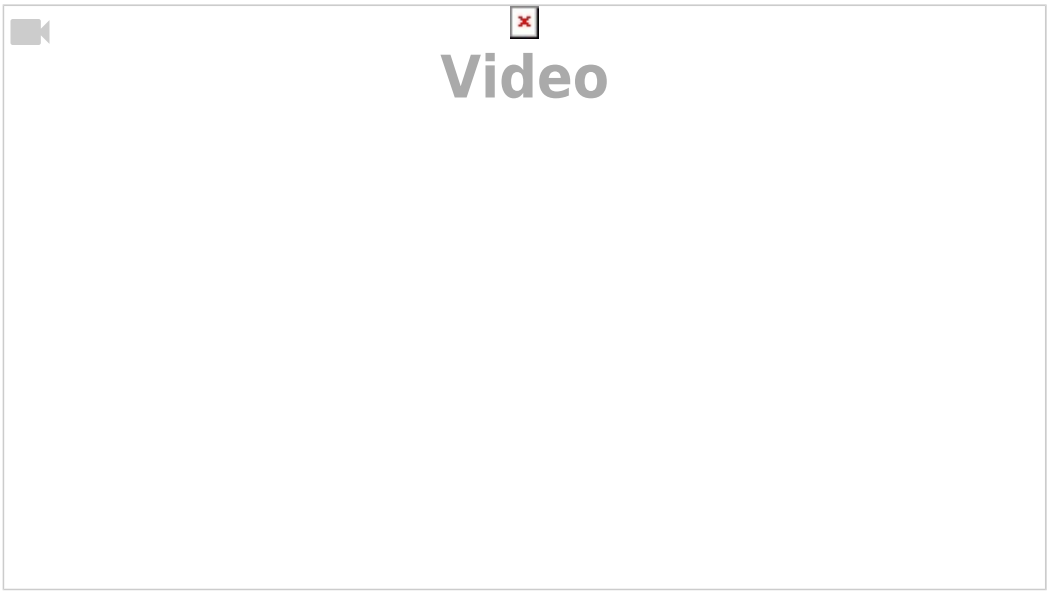

With SAP B1 version 10.0 FP 2405 when trying to access database table via Data Interface (DI) API, the user might get an error //“Cannot access table. Please check it is listed in the allowed list. For more information, see SAP Note 3399053.” //
To solve the issue, go to **Administration → System Initialization → General Settings → Services tab → DI API Configuration group**, click the '...' button next to Enable Query Validation and append the database table to the allowlist.

DB version: 791

DB Branch version: 0

Required Add-On Loader version: 22

Release Notes
Previous Release: 2025.12

New Feature:

> Support scanning of multiple SSCCs when receiving Identical Logistic Units - Documentation
>
> When receiving Identical Logistic Units, the operator can scan multiple supplier SSCC labels. The system stores each unique scanned SSCC and assigns it to a separate logistic unit. If fewer SSCC labels are scanned than required, the operator can either scan the remaining labels or let the system generate SSCCs automatically for the missing units.
>
> Duplicate scans are ignored, ensuring correct traceability for all received units.

Updates:

> Consolidate serial-numbered picklist lines in Mobile Packing
>
> **Improved serial number handling in Mobile Packing.** Previously, serial numbers from different picklist lines had to be entered separately, even if they shared all other attributes.
>
> In Mobile Packing, serial-numbered items that share the same batch, BBD, second batch, and

> quality status can now be entered in a single step. The system automatically sums the quantities of the grouped picklist lines and displays all picked serial numbers together, improving packing efficiency.

> Brazilian Portuguese translation updated – Documentation
>
> The Brazilian Portuguese translation has been updated in the 2026.04.01 release.

Bug fixes:

Ticket	Description
199684	Reception flow - SSCC number not saved correctly when using Identical logistic unit and scan GS1 SSCC barcode 2026.04.00
224092	Picklist controller: order by 2026.04.00
224677	No SSCC on 'issue for production' when waste is true 2026.04.00
239931	Wrong calculation for Total Price in Open Documents report - Picklist 2026.04.00
245532	Issues moving master SSCCs via inventory report 2026.04.00
249054	removing SSCC when performing a replenishment move ends in error 2026.04.00
261673	PMX WMS customer collect BUG- Wrong error message 2026.04.00
263778	AdHoc Moves randomly adding a master SSCC 2026.04.00
268080	API: unable to create GRPO 2026.04.00
271019	Focus is not on the filter bar when shipping by customer 2026.04.00
276450	ad hoc move does not recognize gs1 barcode - qty not filled in and selecting item required 2026.04.00
276452	Item packing does not recognize batch and quantity 2026.04.00
286092	Error in Combine Packed SSCC Flow When Ship-To Address Contains Apostrophe 2026.04.00
266120	Cannot go back when receiving serial numbers 2026.04.01
269834	Ad Hoc Movement → Multiple logistic units : Bin location is not fully visible on the Scan and SSCC screen 2026.04.01
271065	Batch number is not displayed on Mobile Packing flow 2026.04.01
277038	Filtered View Errors 2026.04.01

Ticket	Description
285038	Items Remain Reserved After Unpick Preventing New Proposal Creation 2026.04.01
286374	Not possible to pick non-inventory item without an inventory item 2026.04.01
287735	Produmex AddOn crash when Cycle Count Processing is opened 2026.04.01
288459	Snowcrest is not allowed to pick items - Stock is not Free 2026.04.01
N/A	Production Picklist picking: no track serials are asked for full pallets 2026.04.01
N/A	Container: Due date not considered in PO order on SQL 2026.04.01
256884	Cross docking - Delivery note is not created if Item master setting Produmex - Purchase - Create SSCC on reception = FALSE is set 2026.04.02
270319	Too much issued from production 2026.04.02
271476	Beas reservation is removed after moving a partial stock of an SSCC 2026.04.02
286816	Cannot ship deliveries with bom items - SBO with error code '-5002' and description '1470000145 - Packed item is not part of the delivery 2026.04.02
287894	Error message when shipping Sales BOM 2026.04.02
288862	When SSO is enabled, i cannot customize the WMS Fat Client 2026.04.02
290569	Robot tool doesn't work because SAP user identification 2026.04.02
N/A	Field Quantity not changeable with customization Framework 2026.04.02
N/A	Total sales bom quantity is not put on packing slip 2026.04.02
289785	“Load all SSCCs” Button in shipping not working. Users cant load and ship the SSCCs 2026.04.03
290482	Proposal Allocation does not Prioritize Full LUIDs Despite Stock Order By Configuration 2026.04.03
290689	Proposal generation creates invalid decimal quantities with UoM group items 2026.04.03
291564	Mobile Custom FR: Input field has disappeared in the latest WMS version 2026.04.03
