# Version 17.05.

[Download Version 17.05](#)

## Tested SAP B1 versions

- SAP B1 9.1 PL13 (MSSQL 2012)
- SAP B1 9.2 PL7 HF1 (MSSQL 2016)
- SAP B1 9.1 PL13 (HANA 122.04)
- SAP B1 9.2 PL7 HF1 (HANA 122.04)

*Note: Older and newer SAP B1 versions will usually also work, but haven't been specifically tested in this version.*

### Important remark

There are a few extra steps that must be taken in the upgrading process due the structural changes in the software.

1. Uninstall every BX component including the add-on(s)/control panel, the client application(s), the Service Broker.

2. Insert the following to the service.xml or remove the service.xml completely from C:\ProgramData\BX\Services\.

```xml
<Parameter Name="KILLLONGTIME" ValueType="Integer" Default="300" Description="Kill long time (seconds)">
    <Value>300</Value>
</Parameter>
<Parameter Name="CONCURRENTTASKS" ValueType="Integer" Default="1" Description="Concurrent tasks (piece) [0-not limited]">
    <Value>1</Value>
</Parameter>
```

```xml
<?xml version="1.0" encoding="utf-8"?>
<ServiceConfiguration xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns:xsd="http://www.w3.org/2001/XMLSchema">
  <Services>
    <Service ID="BXServiceBroker" Name="BxServiceBroker" Type="bxservicebroker">
      <Databases>
        <Database>TEST_WMSMF</Database>
      </Databases>
      <WindowsServiceName>BXServiceBroker</WindowsServiceName>
      <LogFilename>[APPLICATIONDATA]\BX\Logs\BxServiceBroker-[WILDCARD].log</LogFilename>
      <Parameters>
        <Parameter Name="KILLLONGTIME" ValueType="Integer" Default="300" Description="Kill long time (seconds)">
          <Value>300</Value>
        </Parameter>
        <Parameter Name="CONCURRENTTASKS" ValueType="Integer" Default="0" Description="Concurrent tasks (piece)[0-not limited]">
          <Value>0</Value>
        </Parameter>
        <Parameter Name="PORT" ValueType="Integer" Default="50231" Description="Port to listen on">
          <Value>50231</Value>
        </Parameter>
```

3. Install the new version of each Produmex component.

Please note: If you are using both Produmex Manufacturing and Produmex Scan, upgrade both in order to be compatible with the new Service Broker version.

Before the upgrade, please check the release notes of the intermediate versions between the current versiona and the version you would like to upgrade to.

## New Functions

- Produmex Manufacturing - Produmex WMS integration
- CR-427 API for Produmex Manufacturing Integration with a 3rd Party Fine Scheduler
- CR-428 JSCP improvements for Drot & Drot
- Cloud setting for Produmex PDC

## Bugfix

- MANUFADDON-410 Data Source - Bad Data Source Offset error when clicking yellow arrow
- MANUFADDON-502 PDC products screen uses wrong setting to skip serial/batch screen
- MANUFADDON-497 PPS license should also include MTO functionality
- MANUFADDON-494 Sales Order cannot be opened from MRP Pegging Information form
- MANUFADDON-488 New sequence of production orders' allocations Retain pinning - moved to new reallocation point
