

Version 18.3.

[Download Version 18.3](#)

Tested SAP B1 versions

- SAP B1 9.2 PL11 (MSSQL 2012, 2016, HANA 122.05)
- SAP B1 9.3 PL05 (MSSQL 2016, HANA 122.16)

Note: Older and newer SAP B1 versions will usually also work, but haven't been specifically tested in this version.

Important remark

Please note: If you are using Service Broker in addition to Produmex Manufacturing, upgrade both in order to be compatible with each other.

Before the upgrade, please check the [release notes](#) of the intermediate versions between the current version and the version you would like to upgrade to.

New Functions

- Supporting online and offline license retrieval from Boyum IT portal
- Adding a new QC Valid Value memo field for unlimited number of QC options. This way the users have the options to define any number of valid value options for a quality parameter. In previous version this was limited to 240 characters total. (CR-135)
- Sequentially Streamlined QC Data Entry (CR-1078). This way a QC officer can enter quality parameter values quickly in a sequence without leaving the parameter value data capture screen.
- The option to switch off automated layout in Produmex Manufacturing add-on forms for B1UP support. This way the buttons, fields placed on an add-on form preserved their absolute coordinate position as defined by the user.
- A new option to define a minimum time gap between two PDC data entries from the same user on the same operation/workcenter. This is to prevent unreasonable PDC booking activities.

Bugfix

- BUG 14947 - SQL error in MTO SOL Picker query
- BUG 15124 - Supporting Serial/Batch Valuation Method of items
- BUG 13315 - MRP: Forward Allocation doesn't work

- BUG 13686 - MRP Result: Error on opening Pegging information
- BUG 14152 - Production Order cannot be duplicated
- BUG 13152 - Unable to use Resource unavailability management for employees resources
