

Version 17.09.

[Download Version 17.09.](#)

Important remark

There are a few extra steps that must be taken in the upgrading process due the structural changes in the software.

1. Uninstall every Produmex Operator component including the add-on, the client application and the Service Broker.
2. Install the new version of each Produmex Operator component.

Please note: If you are using Produmex PDC or Produmex Scan in addition to Produmex Operator, upgrade both in order to be compatible with the new Service Broker version.

New Functions

- Concurrent license handling for terminals
