Version 2021.01

Produmex Download page
Download version 2021.01

Tested SAP B1 versions

- SAP B1 9.3 PL13 32-bit MSSQL 2017
- SAP B1 9.3 PL13 64-bit HANA 1.00.122.22
- SAP B1 10.0 FP2011 64-bit MSSQL 2019

Note: Older and newer SAP B1 versions will usually also work, but have not been specifically tested in this version.

Before the upgrade, make sure that you check the release notes of the intermediate versions between the current version and the version you want to upgrade to.

HANA database privileges

- When using a HANA user other than SYSTEM, grant additional privileges to the user in addition to the standard privileges recommended by SAP. You can set the proper privileges by executing SQL queries, see documentation.

Bug fixes

Ticket	Description
N/A	During company configuration the list is empty if the database user is not SYSTEM
114210	ReturnComponentsScreen ignores the BO_PaymentGroupCode field
128716	Customization - Extra screen shows controls with wrong layout on scaling
