

# Produmex Scan 2021.10

[Produmex Download page](#)  
[Download version 2021.10](#)

## Tested SAP Business One versions

- SAP B1 9.3 PL14 32-bit MSSQL 2017
- SAP B1 9.3 PL13 64-bit HANA 1.00.122.22
- SAP B1 10.0 FP2108 64-bit MSSQL 2019
- SAP B1 10.0 FP2108 64-bit HANA 2.00.044.00

*Note: Older and newer SAP Business One versions will usually also work, but have not been specifically tested in this version.*

Before the upgrade, make sure that you check the [release notes](#) of the intermediate versions between the current version and the version you want to upgrade to.

If you use Produmex Manufacturing and you upgrade to Produmex Scan 2021.10, make sure that you upgrade to Produmex Manufacturing 2021.10 as well. Without upgrade Produmex Manufacturing will not work because of version incompatibility.

Please make sure that you upgrade the Produmex Service Broker.

## Feedback system

- The Usability Improvement Program is available in Produmex Scan.
- The gathered data sent to Boyum IT can be:
  - feedback: generic information (e.g. SAP version, resolution) and add-on specific information (e.g. number of configurations)
  - error
- The UIP tab has been added to the Produmex Scan settings window with the following settings:
  - Usability Improvement Program setting to enable the feature
  - Scheduled Time to Send Data setting
  - Send Errors Only setting
  - Last Date Data was Sent
  - Last Time Data was Sent
- See documentation [here](#).

## Transaction separation

- Transaction Separation for Production Receipt setting and Transaction Separation for Production Issue setting have been added to the Produmex Scan General tab of the Produmex Scan settings window.
- The settings are recommended to be used if more than one employee works on the same purchase order or production order.
- Transaction Separation for Production Receipt setting:
  - If the setting is enabled, the Receipt from Production Flow separates the transactions based on the employees who have been working on the purchase order.
  - Produmex Scan displays the number of purchase order lines that have been received by the given employee and the purchase order lines can be posted based on the separate transactions.
- Transaction Separation for Production Issue setting:
  - If the setting is enabled, the Issue for Production Flow separates the transactions based on the employees who have been working on the production order.
  - Produmex Scan displays the number of production order lines that have been issued by the given employee and the production order lines can be posted based on the separate transactions.
- See documentation [here](#).

## Supported extra fields in Argentinian database

- The POI field and the Folio Number From / To fields are supported if the SAP country database is set to Argentina.
- The POI field is mandatory to be filled in to create documents.
- The fields are supported in the following flows and windows:
  - Goods Receipt PO Flow, Goods Receipt PO window
  - Free Goods Receipt PO Flow, Goods Receipt PO window
  - Sales Return Flow, Delivery window, Return window
- See documentation [here](#) and a demo video [here](#).

## Cursor focusing on Android

- Cursor focusing customization option has been added to Produmex Scan for Android. With the option, you can define the text field on which the cursor is focused and the keyboard is also automatically displayed so that you can immediately start writing.
- See documentation [here](#).

## Bug fixes

Ticket	Description
N/A	Display error in data repeater list in Issue for Production and Receipt from Production screens
N/A	Feedback System - SQL error in Item info query on HANA <a href="#">2021.10.03</a>
147788	Cannot pick the first item using Streamlined Picking setting
147788	Carton UoM qty multiplying on picking
148245	Picking Transfer target selection screen is not shown correctly
148692	Customization - Error when pressing "reload"
150172	Scan fails if other addon uses progress bar <a href="#">2021.10.02</a>

Ticket	Description
151171	Produmex Scan should prevent overpick item in non-real time picking type
151833	“Current stock too low for item” when updating qty for batch on Production Issue <a href="#">2021.10.03</a>
153344	Batch/Serial Selection doesn't work on the Query Stocks on Android <a href="#">2021.10.01</a>
153583	Performance issue with Produmex Scan <a href="#">2021.10.02</a>
154410	Real-time picking multiple batches for the same item with no identical UOM-s (sales, inventory) does not allow to choose multiple batches: Total released qty for sales Order is greater than the open qty <a href="#">2021.10.03</a>
155468	Cannot add a Custom Message/Block on the Back Button on Packing Screen: customization works differently on Windows and Android Device <a href="#">2021.10.03</a>
155717	Customizations in Android client don't work: Event names are different in Android than on Windows devices in customization assistant <a href="#">2021.10.03</a>
156749	Produmex Scan retrieve bad UOM code at first scanning event in Guided Counting <a href="#">2021.10.03</a>
157114	'ButtonAdd' AS [Click\$] does not work on Android, the client freezes and on click of any button on the screen it closes without error message <a href="#">2021.10.03</a>
