Produmex Scan 2022.01

Produmex Download page
Download version 2022.01

Tested SAP Business One versions

- SAP B1 9.3 PL14 32-bit MSSQL 2017
- SAP B1 9.3 PL13 64-bit HANA 1.00.122.22
- SAP B1 10.0 FP2108 HF1 64-bit MSSQL 2019
- SAP B1 10.0 FP2108 HF1 64-bit HANA 2.00.044.00

Note: Older and newer SAP Business One versions will usually also work, but have not been specifically tested in this version.

If you use Produmex Manufacturing and you upgrade to Produmex Scan 2021.10 or higher, make sure that you upgrade to Produmex Manufacturing 2021.10 as well. Without upgrade Produmex Manufacturing will not work because of version incompatibility.

Produmex Scan does not support SAP B1 FP2111 due to an issue with crystal reports.

License check

- Produmex Service Broker checks the client application license.
- The Produmex Service Broker retrieves the application license based on the installation number and the system number. These numbers can be configured in Produmex Service Manager > Produmex Service Broker service configuration window.
- If the installation number and the system number are not provided, the system retrieves these numbers from a license already downloaded by the add-on.
- The license download happens in every 12 hours. If the license cannot be downloaded, the system tries the download process in every 5 minutes.

Bug fixes

Ticket	Description
N/A	Feedback System - SQL error in Item info query on HANA
150172	Scan fails if other addon uses progress bar
151833	“Current stock too low for item” when updating qty for batch on Production Issue
