Produmex Scan 2023.10

Produmex Download page
Download version 2023.10

Tested SAP Business One versions

- SAP Business One 10.0 FP 2208 HF2 64-bit MSSQL 2019
- SAP Business One 10.0 FP 2208 HF2 64-bit HANA 2.00.044.00

Note: Older and newer SAP Business One versions will usually also work, but have not been specifically tested in this version.

If you use Produmex Manufacturing and you upgrade to Produmex Scan 2021.10 or higher, make sure that you upgrade to Produmex Manufacturing 2021.10 as well. Without an upgrade, Produmex Manufacturing will not work because of version incompatibility.

New Feature

Creating Sales Return from a Sales Return Request. The previous “Sales Return” function is split to “Sales Ret. SRR” and “Sales Ret. SDN” in the Main Menu on the interface for both Windows and Android applications. While retaining the existing Sales Return function based on Delivery Document Number under the “Sales Ret. SDN” option, the new “Sales Ret. SRR” feature enables creating a Sales Return from a Sales Return Request. This function supports serial/batch managed items and bin locations. See documentation.

Bug fixes

Ticket	Description
205834	Different customization behavior for BXMobileWH9_GoodsReceiptPOQuantitiesBatchScreen_ButtonAdd_click... 2023.10.01
