

Produmex Scan 2024.06

[Produmex Download page](#)
[Download version 2024.06](#)

Tested SAP Business One versions

- SAP B1 10.0 FP2405 64-bit MSSQL 2019
- SAP B1 10.0 FP2405 64-bit HANA 2.00.059.09

Note: Older and newer SAP Business One versions will usually also work, but have not been specifically tested in this version.

If you use Produmex Manufacturing and you upgrade to Produmex Scan 2021.10 or higher, make sure that you upgrade to Produmex Manufacturing 2021.10 as well. Without an upgrade, Produmex Manufacturing will not work because of version incompatibility.

Produmex Service Broker must be upgraded for this version

With SAP B1 version 10.0 FP 2405 when trying to access database table via Data Interface (DI) API, the user might get an error *“Cannot access table. Please check it is listed in the allowed list. For more information, see SAP Note 3399053.”*

To solve the issue, go to Administration → System Initialization → General Settings → Services tab → DI API Configuration group, click the '...' button next to Enable Query Validation and append the database table to the allowlist.

Modified Scan Setting Name

- In the **Administration > Add-Ons > Produmex Scan > Produmex Scan Settings > Produmex Scan General tab**.
 - On Produmex Scan General tab there is a setting called **“Allow reception of more products than planned”** this can be confusing with Purchase Reception. To avoid this confusing scenario the name of the setting has been modified to **“Allow reception for production of more products than planned”**. For more information read the documentation [here](#).

Bug fixes

Last update: 2024/09/16 07:45 implementation:releasenotes:scan_2024.06 https://wiki.produmex.name/doku.php?id=implementation:releasenotes:scan_2024.06
