Produmex Scan 2024.12

Produmex Download page
Download version 2024.12

Tested SAP Business One versions

- SAP B1 10.0 SP2411 64-bit MSSQL 2019
- SAP B1 10.0 SP2411 64-bit HANA 2.00.059.09

Note: Older and newer SAP Business One versions will usually also work, but have not been specifically tested in this version.

If you use Produmex Manufacturing and you upgrade to Produmex Scan 2021.10 or higher, make sure that you upgrade to Produmex Manufacturing 2021.10 as well. Without an upgrade, Produmex Manufacturing will not work because of version incompatibility.

Produmex Service Broker must be upgraded for this version

With SAP B1 version 10.0 FP 2405 when trying to access database table via Data Interface (DI) API, the user might get an error //“Cannot access table. Please check it is listed in the allowed list. For more information, see SAP Note 3399053.” //
To solve the issue, go to Administration → System Initialization → General Settings → Services tab → DI API Configuration group, click the '...' button next to Enable Query Validation and append the database table to the allowlist.

Release Notes
Previous Release: 2024.09

New Features:

- **Customize the order of the pick list lines - Documentation**
  - The goal is to enable users to sort picklist lines by a custom SQL query for the

"PickingLinesScreen". The system will place the picked items at the end of the list without reloading the entire item list.

- **Supporting SBO Goods Return Request Documents - Documentation**
  - The new functionality is called Goods Return and it's located under the Purchasing menu. Previously this menu was called Goods Receipt PO. The purpose of the Goods Return Request (RR) feature is to create a pre-step in the return process, allowing the entry of agreed quantities, prices, and return reasons before the goods are returned.
- **End-Customer's Feedback - Documentation**
  - Customers can now provide direct feedback on our product through an annual survey. In addition, customers can access the following topics:
    - **News**
    - **Roadmap**
    - **New PMX Version**
  - **Operation System supported:**All supported including Windows Mobile!
