

# Produmex Scan 2025.12

[Produmex Download page](#)  
[Download version 2025.12](#)

## Tested SAP Business One versions

- SAP B1 10.0 SP2511 64-bit MSSQL 2019
- SAP B1 10.0 SP2511 64-bit HANA 2.00.059.09

*Note: Older and newer SAP Business One versions will usually also work, but have not been specifically tested in this version.*

If you use Produmex Manufacturing and you upgrade to Produmex Scan 2021.10 or higher, make sure that you upgrade to Produmex Manufacturing 2021.10 as well. Without an upgrade, Produmex Manufacturing will not work because of version incompatibility.

Produmex Service Broker must be upgraded for this version

With SAP B1 version 10.0 FP 2405 when trying to access database table via Data Interface (DI) API, the user might get an error *"Cannot access table. Please check it is listed in the allowed list. For more information, see SAP Note 3399053."*

To solve the issue, go to Administration → System Initialization → General Settings → Services tab → DI API Configuration group, click the '...' button next to Enable Query Validation and append the database table to the allowlist.

---

## Release Notes

**Previous Release: 2025.09**

---

### New Features:

Create a Valid Value Selection Screen: Select From List - [Documentation](#)

Capture GRPO Images: Add images to GRPO documents - [Documentation](#)
