How to Add a New Database to an Existing Installation

1. Assign the Produmex Scan Add-On to the database.

2. Start the add-on and run the database setup. *When working on a MSSQL environment, create a database backup before starting the database upgrade.*

3. Open Produmex Service Manager. Click on the 'Setup Companies' button and add the database. Then click on the 'Companies' button and enable the company. For more information please see: Produmex Service Manager

4. Run the configurator for Produmex Scan. On the General tab, select the database from the list of databases and click OK.
