3. License Issues

3.1. No terminal license available

User/terminal is over the maximum Total number of terminal licenses concurrent connections: user=EmployeeNo. terminal= ClientAddress/ClientDeviceID company= Company

The current status of the license usage can be seen on a webpage of the Service Broker:

```
http://<IP>:<PORT>/api/admin_accesstokens
```

where the IP is the IP address and the PORT is the port number.

3.2. No Add-on license

3.3. SCAN subscription license issue

Issue
Error: User/terminal is over the maximum 1 concurrent connection

Solution
Customers with subscritpion licenses must restart *Service Broker* at least once every 28 days to refresh the license to avoid this connection error. When the *Service Broker* restarts it always checks the portal for a new license.

> **Note:** It is recommended to schedule a task in **Windows Task Sceduler** to run a weekly restart for **Service Broker**.
