

[Produmex Scan How-to Guides](#) >

# How to Perform a Version Upgrade

Please always check the [release notes](#) of the new version before starting the upgrade, because it might contains important information regarding the upgrade.

## 1. Produmex Scan Add-on

The steps of a version upgrade for the Produmex Scan add-on are identical to a [new installation](#).

If you are upgrading from a version higher than 17.05, it is not required to uninstall the current version before starting the upgrade.

When the add-on is started the first time after the upgrade, the database setup will run.

*Please note: In order to run the database setup, a database backup that was created within an hour is required on an MSSQL environment.*

## 2. Produmex Service Broker

If you are upgrading from version 17.09 or higher, it is not required to install a new version of the Service Broker for an upgrade of Produmex PDC/Scan. If you are upgrading from a version previous to 17.09, please take the extra steps described here: [Version 17.09](#). The steps of a version upgrade are identical to a [new installation](#).

If you would like to uninstall the 32-bit DI API when upgrading to the 64-bit Service Broker, it is advised to uninstall both the 32-bit and the 64-bit DI API and then install the 64-bit DI API again because on certain SBO versions the uninstallation of the 32-bit DI API can cause issues for the 64-bit DI API.

### Compatibility matrix

		Service Broker Version				
		18.2.	18.1.	17.11.	17.09.	17.05.
Server Module version	18.2.	✓	✓	✓		
	18.1.		✓	✓		
	17.11.			✓		
	17.09.				✓	
	17.05.					✓

## 3. Server Module

The steps of the version upgrade for the server module are identical to a [new installation](#).

## 4. Produmex Scan client

The steps of the version upgrade for the Scan Client are identical to a [new installation](#). If you are upgrading from a version higher than 17.05, only uninstall the current Produmex Scan version if based on the settings of the operating system, the installation process requires it.
