

[Produmex Scan How-to Guides](#) >

# How to Perform a Version Upgrade

Please always check the [release notes](#) of the new version before starting the upgrade, because it might contains important information regarding the upgrade.

## 1. Produmex Scan Add-on

The steps of a version upgrade for the Produmex Scan add-on are identical to a [new installation](#).

If you are upgrading from a version higher than 17.05, it is not required to uninstall the current version before starting the upgrade.

When the add-on is started the first time after the upgrade, the database setup will run.

*Please note: In order to run the database setup, a database backup that was created within an hour is required on an MSSQL environment.*

## 2. Produmex Service Broker

## 3. Server Module

## 4. Produmex Scan client

The steps of the version upgrade for the Scan Client are identical to a [new installation](#). If you are upgrading from a version higher than 17.05, only uninstall the current Produmex Scan version if based on the settings of the operating system, the installation process requires it.
