

Produmex WMS Picking Flows >

Ad Hoc Picking Flow

Overview

This documentation describes the three tasks of the Ad Hoc Picking flow on the Mobile Client: [Customer Collect](#), [Picklist](#) and [Route](#).

Configuration

1. Configure the [Produmex picklist types UDT](#).
2. Configure the Ad Hoc Picking settings and the General settings on the [picklist controller](#) (Organizational Structure > Extension Parameters > Picklist Controller > Ad Hoc Picking / General).

Customer Collect

Picklist

Route
