

### 3.2.4. Business partner master data

#### **S/P remarks pop-up**

If checked, the text in the Sales/Purchase remarks is shown as a pop-up when using this business partner in a sales/purchase document in SAP.

#### **Sales/Purchase remarks**

The Sales/Purchase remarks to be shown when selecting the business partner in a sales/purchase document in SAP.

#### **Group sales delivery**

If various orders for a customer have been entered and picked, it is possible to group the various orders in one sales delivery (Y) or to have a sales delivery per individual order (N). It is also possible to base this setting on the extension parameter "Sales delivery note generator" at the company level in the organization structure.

#### **Linked Business Partner**

In a third party logistics context, a supplier can be linked to a customer so that a purchase order to the supplier can be linked to a sales order to the customer.

#### **Pick list type**

In case a default pick list type applies to a business partner, this can be indicated here. When a proposal is created, it will set a pick list type in this order:

- On document
- On business partner (*Only for sales proposals*)
- Default pick list type

#### **Pallet packing type**

This is used during packing, consolidated packing, item packing, in combination with allowing to use the pallet packing type on customer (*Setting on PackingController*).

Possible values:

- Pallet (Default)
  - In case master is allowed, then user is asked whether to create master SSCC or normal SSCC
- Multiple identical pallets
  - Creates identical normal pallets
- Pallet - Multiple identical sub packages
  - Creates 1 master SSCC, but identical sub SSCC's
- Always ask user
  - Ask the user how to create the pallets
    - Identical master and/or identical sub SSCC's are allowed.

#### **Check to add return items**

Defines whether the system adds returnable items when booking a document for this business partner or not. Possible values:

- If set to 'Yes', the system adds returnable items when booking a document for this business partner.

- If set to 'No', the system does not add returnable items to the documents of this business partner.
- If set to 'Take setting on company', returnable items are added based on the 'Check to add returnable items' setting on the [General tab](#) of the Organizational Structure.

### ***Enter specific pallet number?***

If checked, a supplier pallet number needs to be entered during reception. This is stored on the table (PMX\_LUID) where the SSCC is stored.

If for certain business partners you use that business partner's own pallets (*meaning that these have to be traceable within your company*), you can indicate that upon receipt of such a pallet, the pallet number has to be registered.

### ***Has no logistic carriers***

If checked, the screen to select a logistic carrier will be skipped during the reception process

### ***Has no logistic labels***

If checked, the screen to scan the logistic label will be skipped during the reception process

### ***Has no identical logistic units***

If checked, the screen to choose between identical and non identical logistic units will be skipped during the reception process

### ***Never delivers mixed logistic units?***

If checked, the screen to add more items to the logistic unit will be skipped during the reception process

### ***Group purchase delivery***

If stock is received based on multiple purchase orders from the same vendor, it is possible to group the orders into a single Goods Receipt PO document. Possible values:

- If set to 'Yes', a single Goods Receipt PO document is created for every purchase order that is received in one step.
- If set to 'No', a separate Goods Receipt PO document is created for each purchase order.
- If set to 'Take setting on company', the Goods Receipt PO document is created based on the 'Group purchase delivery' setting on the [Purchase delivery generator](#).
