

2.15. Config tab

The Config tab list some configuration that can be done for several processes and customer specific configuration can be stored here.

Google API key

- Route maps: An API key is needed to run the Google maps functionality.
- Each customer needs to get his own API key to be entered in the Google API key field.
- The Google API key must be created [here](#) and its status must be set to active.

For information about the ASOPLG and Create proposal settings click [here](#).

For information on the Interface monitor settings click [here](#).
