

5.1.3.64. Create SAP delivery from PMX delivery controller

This controller holds the configuration for the tool to create an SAP delivery from a PMX sales shipping.

Create SAP delivery

This is the default controller.

Create automatically SAP delivery from PMX deliveries? (Y/N)

This is not used. When installing a recent version on a new DB, this setting will not be present. In older Db's this setting exists, but does not do anything.
