2.3.8. Freight charges definitions (PMX_FCDE)

Configuration of freight charges that will be added to a sales document.

Freight charges definition code
The line number of the freight to be added. The freight charges are added on a sales order when it is added. The line number must correspond to a line in the freight charges screen on sales order header:

Freight charges definition name
The name of the freight charges.

Shipping type code
The shipping type code where this freight charge needs to be added.

Cost
The price to be added.

Min. document price
The minimum document price that is required to add the cost.

Example:

Freight code	Shipping type code	Cost	Min document price
1	1	30	0
1	1	20	100
1	1	0	200

- **If the price is between 0 and 99,999999**, a cost of 30 will be added to Freight for shipping type 1
- **If the price is between 100 and 199,999999**, a cost of 20 will be added to Freight for shipping type 1
- **If the price is above or equal to 200**, no cost will be added to Freight for shipping type 1
