☐ Do Not Lock Stock on Picking (Picklists can be created even if no stock is available.)

☐ Allow Overpicking ☐ Allow Overpicking (Customer Collect)

☐ Count Colli After Picking

☒ Embed .NET forms in SBO forms ☐ Usability Improvement Program

Ok Cancel Export Close

3. Make sure the IP address or host name of the server where the PMX License Server is running is filled in as add-on clients require this to be able to connect.

You can do this initially on the SBO license server itself because the add-on will try to connect locally if this field is empty.

If it is not possible to run the add-on on the machine running the PMX License Server, enter this information in the database after creating the company element. Table "PMX_OSCO", field "SboLicenseServerAddress": only enter the IP address or host name, no port or other information is allowed.

The process of a fresh installation is finished. The [next section](#) describes the process of performing a version upgrade.
