

3.4.2. Enable a custom stored procedure

Every custom stored procedure related to Prodimex WMS should be called from the PMX_TransactionNotification stored procedure as this stored procedure is executed from all Prodimex WMS flows and processes when creating or modifying a document.

The SBO_SP_TransactionNotification is only called when creating or modifying a standard SAP document.

1. Open the custom stored procedure.

In this example: PMX_SP_OECTransactionNotification.

```

479
276 --END
277
278
279 ----Following code must be added to the stored procedure SBO_SP_TransactionNotification
280 ----to execute the PMX stored procedure:
281
282 -----Start executing Prodimex Logex Addon code for OEC
283 -----
284 --IF @error = 0
285 --BEGIN
286 -- BEGIN TRY
287 -- EXEC [dbo].[PMX_SP_OECTransactionNotification]
288 --     @object_type,
289 --     @transaction_type,
290 --     @num_of_cols_in_key,
291 --     @list_of_key_cols_tab_del,
292 --     @list_of_cols_val_tab_del,
293 --     @error = @error OUTPUT,
294 --     @error_message = @error_message OUTPUT
295 -- END TRY
296 -- BEGIN CATCH
297 --     SELECT @error = ERROR_NUMBER(), @error_message = ERROR_MESSAGE()
298 --     SET @msg = SUBSTRING('PMX_SP_OEC: sql error ' + CAST(ERROR_NUMBER() AS NVARCHAR) + ' : ' + ERROR_MESSAGE()
299 --         + ISNULL(' line ' + CAST(ERROR_LINE() AS NVARCHAR), '') + ISNULL(' in ' + ERROR_PROCEDURE(), ''), 1, 255)
300 --     EXEC xp_logevent 999999, @msg, ERROR
301 -- END CATCH;
302 --END
303 -----End executing Prodimex Logex Addon code
304 -----
  
```

2. Select the commented text and copy it to the clipboard (Ctrl+C).

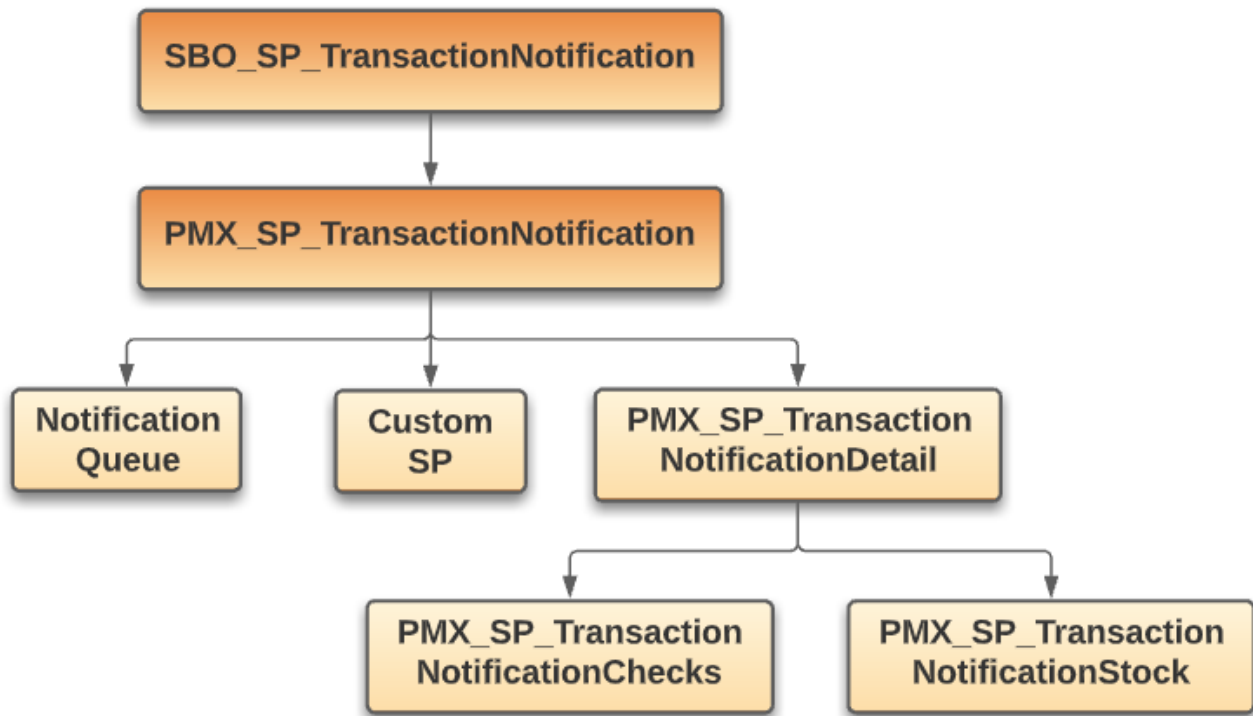

3. Open the PMX_SP_TransactionNotification for modification.

4. Paste the text to the PMX_SP_TransactionNotification (Ctrl+V) and uncomment it.

Note: If you have an older custom stored procedure, the header of the commented text may say that you should add it to the SBO_SP_TransactionNotification, but it should be added to the PMX_SP_TransactionNotification in this case as well.

5. Alter the PMX_SP_TransactionNotification with this modification.

Stored procedure call hierarchy
