

## 3.4.2. Enable a custom stored procedure

Every custom stored procedure related to Prodimex WMS should be called from the PMX\_TransactionNotification stored procedure as this stored procedure is executed from all Prodimex WMS flows and processes when creating or modifying a document.

The SBO\_SP\_TransactionNotification is only called when creating or modifying a standard SAP document.

### 1. Open the custom stored procedure.

In this example: PMX\_SP\_OECTransactionNotification.

```

479
276 --END
277
278
279 ----Following code must be added to the stored procedure SBO_SP_TransactionNotification
280 ----to execute the PMX stored procedure:
281
282 -----
283 -----Start executing Prodimex Logex Addon code for OEC
284 -----
285 --IF @error = 0
286 --BEGIN
287 -- BEGIN TRY
288 -- EXEC [dbo].[PMX_SP_OECTransactionNotification]
289 -- @object_type,
290 -- @transaction_type,
291 -- @num_of_cols_in_key,
292 -- @list_of_key_cols_tab_del,
293 -- @list_of_cols_val_tab_del,
294 -- @error = @error OUTPUT,
295 -- @error_message = @error_message OUTPUT
296 -- END TRY
297 -- BEGIN CATCH
298 -- SELECT @error = ERROR_NUMBER(), @error_message = ERROR_MESSAGE()
299 -- SET @msg = SUBSTRING('PMX_SP_OEC: sql error ' + CAST(ERROR_NUMBER() AS NVARCHAR) + ' : ' + ERROR_MESSAGE()
300 -- + ISNULL(' line ' + CAST(ERROR_LINE() AS NVARCHAR), '') + ISNULL(' in ' + ERROR_PROCEDURE(), ''),1,255)
301 -- EXEC xp_logevent 999999, @msg, ERROR
302 -- END CATCH;
303 --END
304 -----
305 -----End executing Prodimex Logex Addon code
306 -----

```

### 2. Select the commented text and copy it to the clipboard (Ctrl+C).

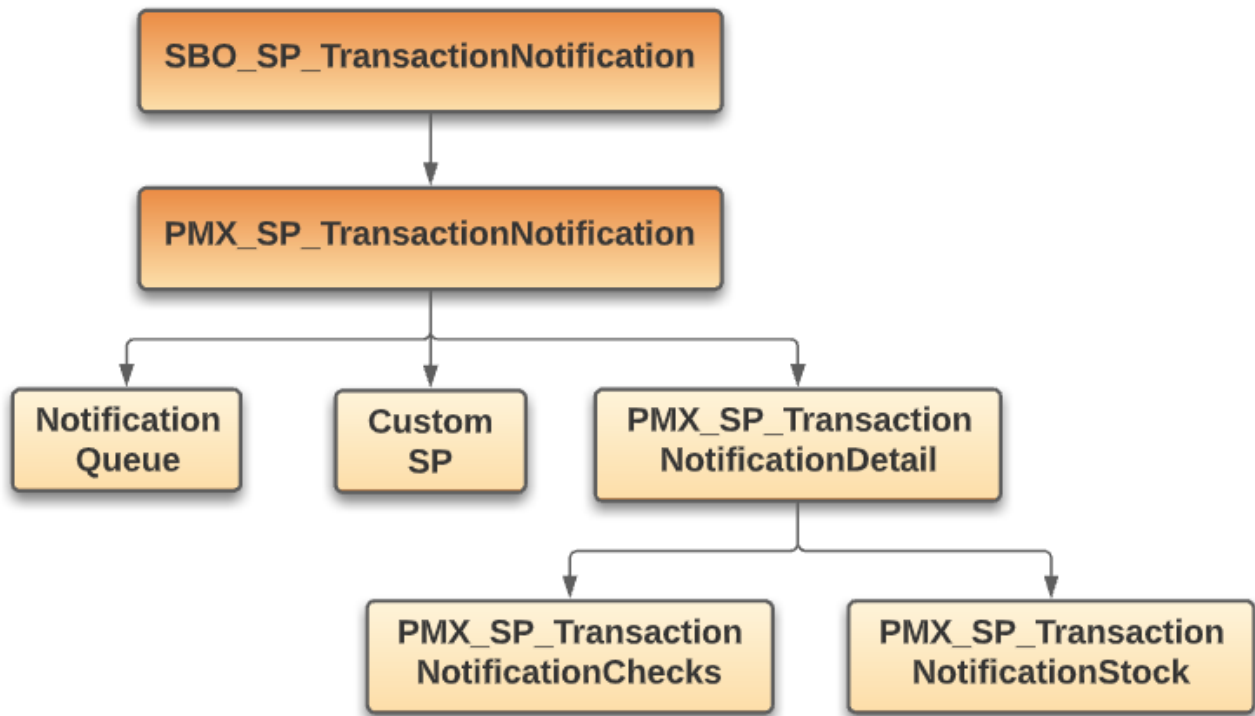

### 3. Open the PMX\_SP\_TransactionNotification for modification.

### 4. Paste the text to the PMX\_SP\_TransactionNotification (Ctrl+V) and uncomment it.

Note: If you have an older custom stored procedure, the header of the commented text may say that you should add it to the SBO\_SP\_TransactionNotification, but it should be added to the PMX\_SP\_TransactionNotification in this case as well.

### 5. Alter the PMX\_SP\_TransactionNotification with this modification.

## Stored procedure call hierarchy
