3.3.3. Configure the Produmex SB1 Notification Listener

Note: Make sure you do not perform the configuration on an environment with active users.

In order to activate the SB1 Notification listener, you need to enable the Service Broker as follows.

1. On the Produmex Suite Installer screen click the Config button of the Produmex SB1 Notification Listener.

2. Click the Run in console mode button of the Configuration Database option.

Produmex Suite Installer		
Produmex SB1 Notification Listener		
Configure database	Run in console mode	
List actions	Run in console mode	
	Close	

It shows the following console.

📧 C:\Program Files (x86)\Produmex_quality\Produmex SB1 Notification Listener (S 🗖 🗖	×
:: Produmex.Foundation.SboNotification.ServiceHost 18.2.1.2 ::	^
Configuring database	
Press 'enter' to exit	

3. Press ENTER to finish the database configuration.

Now list the actions that the Produmex SB1 Notification Listener needs to listen to by proceeding as follows.

4. Click the Run in console mode of the List Actions option.

Produmex Suite Installer		
Produmex SB1 Notification Listener		
Configure database	Run in console mode	
List actions	Run in console mode	
	Close	

The tool adds the actions to the config-file located in the installation folder of the Produmex SB1 Notification Listener.

5. Press ENTER to exit and close the screen of the options.

6. Click Save on the Produmex Suite Installer screen and close it.

Continue with section 3.4. Adaptation of stored procedures.
