

## 1.3. Item Master Data: Inventory Data tab

The following columns are added to the inventory grid:

### ***Uom2 Qty Warehouse***

This is the quantity for the second UOM that is in stock. In case it is a catch weight item, this will be the actual weight. If it is an item with a UOM2, but no catch weight, this will be the calculation of UOM2 based on the default ratio between both UOM.

### ***Uom2 Qty Confirmed***

This is the quantity for the second UOM that is committed. The calculation of UOM2 based on the default ratio between both UOM.

### ***Uom2 Qty Ordered***

This is the quantity for the second UOM that is ordered. The calculation of UOM2 based on the default ratio between both UOM.

### ***Uom2 Qty Available***

This is the quantity for the second UOM that is available. The calculation is: (In stock + Ordered) - Confirmed

Note: The above listed UoM2 columns are filled in only when there is a UoM2 defined.

### ***PMX Free Stock***

This is the free stock that is available for Produmex. This is the sum of the quantity in inventory minus the sum of the quantity that is locked.

$(SUM(PMX\_INVT.Quantity) - SUM(PMX\_INLD.Quantity))$
