

Extra Fields for Argentinian Database

Overview

From product version 2021.09, Produmex WMS supports the POI field and the Folio Number From / To fields if the SAP country database is set to Argentina.

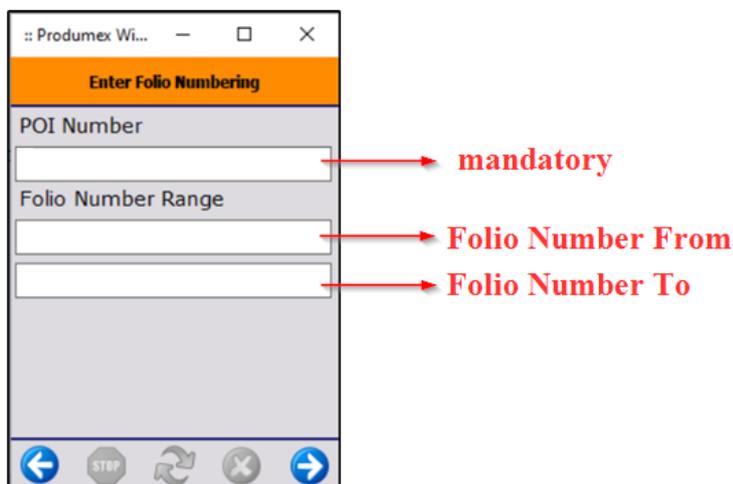

The fields are supported in the following flows and windows:

1	Mobile Client	Reception Flow based on a purchase order	Goods Receipt PO window
2	Mobile Client	Reception Flow without a purchase order	Goods Receipt PO window
3	Mobile Client	Container Reception Flow	Goods Receipt PO window
4	Mobile Client	Bulk Reception Flow based on a purchase order	Goods Receipt PO window
5	Mobile Client	Bulk Reception Flow without a purchase order	Goods Receipt PO window
6	Mobile Client	ASN Reception Flow	Goods Receipt PO window
7	ASN Reception	Open ASN Lines window (Produmex menu): POI, Folio Number From / To fields	Goods Receipt PO window
8	Mobile Client	Sales Return flow: sales return request, delivery, no delivery	Return window

Flows on Mobile Client

Every flow on the Mobile Client includes a separate Enter Folio Numbering screen for the extra fields.

- The POI field is mandatory to be filled in to create the necessary documents.
- Filling in the fields of the Folio Number Range is optional.
- When the Folio Number From field is filled in, the system displays the same data in the Folio Number to field and the data can be modified.

The extra screen is displayed in the flows as follows.

Open ASN Lines window

In the Open ASN Lines window (Produmex menu) the three extra columns are editable. You can fill in the columns, save the data and create Goods receipt PO documents.

Created documents

On the created documents the system fills in the extra fields.
