

2.3.51. Open Documents Screen Controller

All Extension Parameters : [2.3. Extension Parameters tab](#)

Extension: Controller for the Open Documents Screen

The screenshot shows the 'Organizational Structure - Produmex WMS Add-On' application window. The 'Extension Parameters' tab is active for the 'WMS_Demo (COMP)' extension. The window is divided into several sections, each with a title and a table of configuration parameters. The parameters include 'Order by', 'View name', and 'Grid localization key' for various container types, move orders, picklists, picklist proposals, routes, and weigh orders. The 'Order by' fields are dropdown menus, while the 'View name' and 'Grid localization key' fields are text boxes. The 'Grid localization key' values are all prefixed with 'Logex.AddOn.OpenDocumentsReportForm.Grid.'. At the bottom of the window, there are 'Ok', 'Cancel', 'Export', and 'Close' buttons.
