3.2. Production order header

Produmex production status
Next to the status of SAP, there is the Produmex production status.
Possible values: Planned, On hold, Started, Closed

Production step list
Next to the item to produce, the user can select a steplist.
The requirements to select a steplist:

- One or more steplists for the item to produce needs to be configured
- The production type needs to be 'Special'

When a step list is selected, a list of components is created according to the selected steplist.

Production line
Next to the warehouse, the user can select the production line where this production order needs to be produced. Only the production lines in the warehouse are shown.
