

2.3.21. Pmx priority (PMX_PRIO)

The Produmex priorities. This is used on pick list (proposals) and move orders. The system has already 3 predefined priorities:

- High (100)
- Normal (200)
- Low (300)

Sequence

A number defining the order of the priority. The value needs to be unique. Order is done ascending. This means that 1 has a higher priority than 99.

Is default?

For the default priority this option should be set to true.
