2.3.66. Receive from Whs Controller

> **All Extension Parameters : 2.3. Extension Parameters tab**

Extension: Receive from WHS Controller – Controls the Receive from Whs Flow

General

Line remarks view name
The view that gets the line remarks to show on the scanner after the product is identified. This view needs at least these columns:

- ObjType
- DocEntry
- LineNum
- ItemCode

The view can return multiple rows/columns for the same document. The screen to show the remarks will then show the data in multiple rows/columns.

Move all items in 1 stock transfer? (Y/N)
If enabled, the Inventory Transfer Document is created after every item is transferred, otherwise an Inventory Transfer Document is created after each transferred LUID.

Remarks view name
The view that gets the line remarks to show on the scanner after the Inventory Transfer Document is identified. This view needs at least these columns:

- ObjType
- DocEntry

The view can return multiple rows/columns for the same document. The screen to show the remarks will then show the data in multiple rows/columns.
