

## 2.3.66. Receive from Whs Controller

### All Extension Parameters : [2.3. Extension Parameters tab](#)

Extension: Receive from WHS Controller – Controls the Receive from Whs Flow

### General

#### **Line remarks view name**

The view that gets the line remarks to show on the scanner after the product is identified. This view needs at least these columns:

- ObjType
- DocEntry
- LineNum
- ItemCode

The view can return multiple rows/columns for the same document. The screen to show the remarks will then show the data in multiple rows/columns.

#### **Move all items in 1 stock transfer? (Y/N)**

If enabled, the Inventory Transfer Document is created after every item is transferred, otherwise an Inventory Transfer Document is created after each transferred LUID.

#### **Remarks view name**

The view that gets the line remarks to show on the scanner after the Inventory Transfer Document is identified. This view needs at least these columns:

- ObjType
- DocEntry

The view can return multiple rows/columns for the same document. The screen to show the remarks will then show the data in multiple rows/columns.
