

### 5.1.3.68. Receive from WHS controller

*Receive from WHS controller – Controls the Receive from WHS flow*

#### **General**

##### **Line remarks view name**

The view that gets the line remarks to show on the scanner after the product is identified. This view needs at least these columns:

- ObjType
- DocEntry
- LineNum
- ItemCode

The view can return multiple rows/columns for the same document. The screen to show the remarks will then show the data in multiple rows/columns.

##### **Move all items in 1 stock transfer? (Y/N)**

If enabled, the Inventory Transfer Document is created after every item is transferred, otherwise an Inventory Transfer Document is created after each transferred LUID.

##### **Remarks view name**

The view that gets the line remarks to show on the scanner after the Inventory Transfer Document is identified. This view needs at least these columns:

- ObjType
- DocEntry

The view can return multiple rows/columns for the same document. The screen to show the remarks will then show the data in multiple rows/columns.
