

Robot Tool

The Robot Tool is an executable tool that is started with command line parameters.

The command line parameters indicate the specific functionality that needs to be executed. If the `/RobotType` or `/t` parameter is not passed, the system defaults to *PickListRobot*.

Example 1

If you pass command line `/?` all possible command line parameters will be displayed together with a description.

```
Produmex.Sbo.Logex.Tools.Robot.exe /?
```

Example 2

To run the [Minimim Stock Level tool](#) you need to execute:

```
Produmex.Sbo.Logex.Tools.Robot.exe /t:customerminimumstock
```

```
C:\Program Files\Produmex\Produmex Tools>Produmex.Sbo.Logex.Tools.Robot.exe /t:customerminimumstock
```

To run the [Minimim Stock Level tool](#) for a specific database you need to execute:

```
Produmex.Sbo.Logex.Tools.Robot.exe /t:customerminimumstock /cs:SboConnectionStringTest
```
