

2.3.72. Serial Number Controller

Extension: Serial Number Controller - Controls the Serial Numbers

Always entering serial numbers in uppercase? (Y/N)

If set to true, the system will always put the entered serial numbers in upper case.

Ask for dest. loc. before entering serial numbers? (Y/N)

When moving stock, the system normally first asks to scan the serial numbers before asking for the location.

If the user wants to first ask for the destination location, this option can be set.

Picking: Warn when serial number has been sent in the past? (Y/N)

When this is enabled, the user will see a warning when this serial number has already been used in a delivery or pick list.

This check happens for the item, and does not take into account the batch.
