

1.3. Set the 3PL price(s) to the item

Open the Item Master Data window. Under the Produmex tab, go to the 3PL tab. At this tab the item's 3PL prices can be defined.

- The 3PL inbound price will be used when the price calculation is based on the inbound item quantity.
- The 3PL outbound price will be used when the price calculation is based on the outbound item quantity.

The screenshot shows the 'Item Master Data' window with the 'Produmex' tab selected. Within the 'Produmex' tab, the '3PL' sub-tab is active. The '3PL Inbound Price' and '3PL Outbound Price' fields are highlighted in yellow and both contain the value '0.00'. Other tabs visible include General, Purchasing Data, Sales Data, Inventory Data, Planning Data, Production Data, Properties, Remarks, and Attachments. The 'Inventory Data' sub-tab is also visible, showing 'Inventory', 'Sales', 'Purchase', 'Production', 'Catch Weight', and 'Attributes'.

For further information about the 3PL prices see: [3.1.3. Produmex 3PL Tab](#)
