

### 2.3.13. Link usergroup to authorization table (PMX\_UGAU)

Define the authorization a user group can have.

**User code**

The code of the user.

**User group code**

The user group code. The user group code can be selected from a list. The list comes from the 'User group for PMX' UDT.

**User authorization code**

The user authorization code. The user authorization code can be selected from a list. The list comes from the 'User authorization definition' UDT.

**Value**

The actual authorization. Possible values:

- Disabled
- Enabled
- Hidden
