

## 4.5. Register a new add-on loader

In general, for a Produmex WMS version upgrade it is not needed to install a new version of the add-on loader. Consult with the [Compatibility Matrix](#) and check if the installation of a new version is needed. The document describes which add-on loader version is required for the given add-on version.

Note: It is possible to have multiple add-on loader versions installed on one server.

For more information on how to install the Add-on Loader see section [3.5. Register the Produmex add-on](#).
