

2.2. Users

Additional setting for users

- It is possible to set the language in which the “thin client” application runs for each individual users. To do this select Administration → Setup → General → Users. A user-defined field “Language” has been added there to allow you to set the language code for the user in question. This language is used on the scanner/touchscreen when the user has logged on.
- It is also possible to assign a user to a PMX User Group. The available authorizations are defined in the UDT “[PMX_UAUT](#)” (*User Authorizations Definitions Table*) and can be linked to the PMX User Groups (UDT “[PMX_USGR](#)”) through the UDT “[PMX_UGAU](#)” (*Link Usergroup To Authorizations Table*).

The screenshot displays the 'Users - Setup' window with the 'General' tab selected. The window is divided into two main sections. The left section contains fields for user identification and contact information, while the right section shows a list of available PMX User Groups for selection.

User Identification Fields:

- ☒ Superuser ☐ Mobile User
- User Code: manager
- User Name: manager
- Defaults: (empty field)
- Bind with Microsoft Windows Account: (empty field)
- Employee: (dropdown menu)
- E-Mail: (empty field)
- Mobile Phone: (empty field)
- Mobile Device ID: (empty field)
- Fax: (empty field)
- Branch: Main (dropdown menu)
- Department: General (dropdown menu)
- Groups: (empty field with a selection icon)
- Password: (masked field with a selection icon)
- ☒ Password Never Expires
- ☐ Change Password at Next Logon
- ☐ Locked
- ☐ Enable Setting Integration Packages
- ☒ Take Control of eDoc Processing in Electronic Document Monitor

PMX User Group Selection:

The right section shows a list of available PMX User Groups. The 'Language' field is set to 'General'. The 'Pmx User group' dropdown is open, showing the following options:

| User PIN | Language |
|-----------|----------------|
| 01_ADMIN | Administration |
| 02_SHPFLR | Shopfloor |

At the bottom of the window, there are buttons for 'OK', 'Cancel', 'Copy Form Settings', 'Authorizations', and 'Licenses'.
