2.2. Users

Additional setting for users

- It is possible to set the language in which the "thin client" application runs for each individual users. To do this select Administration → Setup → General → Users. A user-defined field "Language" has been added there to allow you to set the language code for the user in question. This language is used on the scanner/touchscreen when the user has logged on.
- It is also possible to assign a user to a PMX User Group. The available authorizations are defined in the UDT "PMX_UAUT" *(User Authorizations Definitions Table)* and can be linked to the PMX User Groups *(UDT "PMX_USGR")* through the UDT "PMX_UGAU" *(Link Usergroup To Authorizations Table)*.
