

Produmex Operator Customization Technology

1. Customization Process

1.1. Enable the Customization Assist

Start Produmex Operator on your device. On the Login screen press the Configuration button to open the [Configuration screen](#). On the Configuration screen enable the Customization Assist by sliding the bar to right. Press the 'Apply' button.

Configuration

Server URL: <http://192.168.0.144:50231/>

Employee:

Company: MWDemoUS

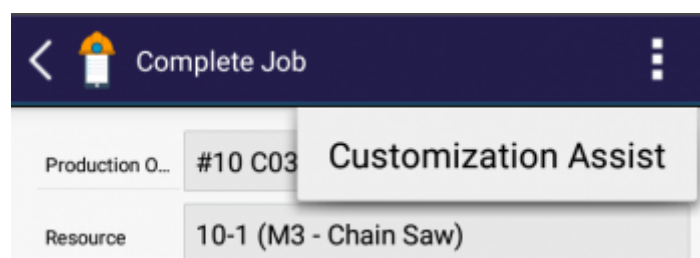

Simple Work Time Mode: No

Customization Assist: Yes

Apply

1.2. Run client application

Press the  button on the top right corner of the screen then select the 'Customization Assist' option. The 'Customization for ScreenName' screen will open up.

Complete Job

Production O...: #10 C03

Resource: 10-1 (M3 - Chain Saw)

Customization Assist

On the 'Controls' tab the possible parameters for customization user queries are listed with their type

and current value. On the 'Events' tab the customizable events are listed. The checkbox indicates whether there is an existing custom query for the event or not.

Customization for StopJobScreen

Controls

Events

Parameter Name	Type	Value

BXMobileWorker_StopJobScreen_TextReso...	☐

Press the email icon to send the 'Customization log for *ScenName*' file. The log file contains the list of the customizable controls and customizable events.

2. Supported message types

The following message types can be used in user queries for Produmex Operator:

- **I: Information**

A green line will appear at the footer of the screen with the message. The event will execute.

- **W: Warning**

A blue line will appear at the footer of the screen with the message. The event will execute.

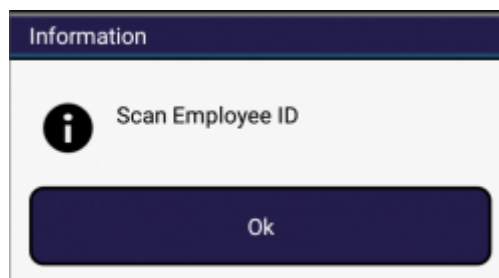

- **E: Error**

This is the default message type value. A red line will appear at the footer of the screen with the message. The event not will execute.

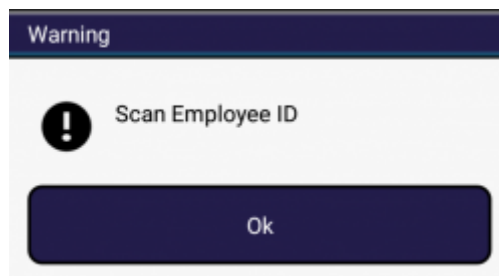

- **IM: Information with message box**

A pop up information message will be prompted, that needs user confirmation (OK). The event will execute.

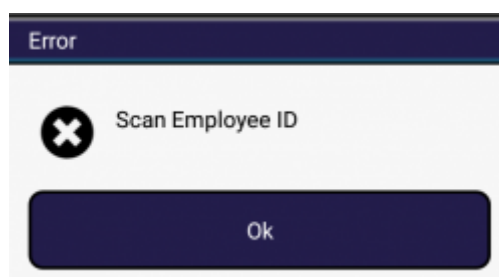

- **WM: Warning with message box**

A pop up warning message will be prompted, that needs user confirmation (OK). The event will execute.

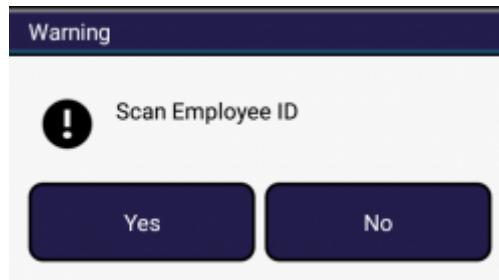

- **EM: Error with message box**

A pop up error message will be prompted, that needs user confirmation (OK). The event will not execute.

- **YM: Yes/No with message box**

A pop up confirmation message will be prompted, that can be answered with yes or no. The event will execute depending on user choice.
